4. The filed application supported that 300MS 8ME LLC was properly licensed and qualified to do business in Nevada; that 300MS 8ME LLC, had obtained all required discretionary state and local licenses and permits, with the remaining permits to be obtained prior to start of construction, expected sometime during 4th Quarter of 2026, and intended to maintain all of the required licenses and permits for the Facility; that 300MS 8ME LLC had all necessary approvals for the Facility; that the Facility would have an AC nameplate rating of up to 300 MW AC; that the Facility was anticipated to be at least partially operational sometime during 3rd Quarter of 2028; that the total capital investment of the Facility in Nevada will be approximately $939,130,197.00; that the Facility would create approximately 10 full-time operational jobs which would pay an average of approximately $49.04 per hour; and that the Facility would

create an estimated 200 full-time construction jobs over the course of construction which would pay an average hourly wage of $57.51 per hour.

5. That the average hourly wage that will be paid by the Facility to its employees in this State, excluding management and administrative employees, is approximately $49.04, which is at least 110% of the average statewide hourly wage for green industry tax abatements, currently posted by Department of Employment Training and Rehabilitation.

6. That the average hourly wage paid by the Facility to all its construction employees working on the Facility, excluding management and administrative employees, will be approximately $57.51, which is at least 175% of the average statewide hourly wage for green industry tax abatements, currently posted by Department of Employment Training and Rehabilitation.
